

TRAINING ON ONLINE APPLICATION ROLLING ADMISSIONS SYSTEMS

The training was held at ICT undergraduate lab on 21st, April, 2017 and was conducted by senior ICT staff led by B. Mutisya and Julianne Anyim. The University launched the online application system and introduced the rolling admission system in order to increase the efficiency of the admission process. This system is very flexible and it allows students to submit applications from all over the globe at any time therefore breaking the barrier of time and space. Speaking during the training director CESSP Dr. Julius Ogeng'o urged the staff to use the rolling admission system to ensure that the campus receives, respond and admit students throughout the year. Ogeng'o explained to the staff that every day is an admission and application day and that the system allows adequate time to communicate with the successful applicants early, which allow them to solicit funding and plan their time which also allows the campus time to schedule courser, programmes and plan human and physical resources.
